Art Unit: 3739

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-27 are, drawn to apparatus for treating body conduits, classified in class
 606, subclass 7.
- II. Claims 28-32 are, drawn to a method of treating asthma, classified in class 128, subclass 898.
- III. Claims 33-37, drawn to a method of treating resparatory conditions, classified in class 607, subclass 88.
- IV. Claims 38-42, drawn to a method of treating an esophagus, classified in class606, subclass 2.
- V.. Claims 43-47, drawn to a method of treating a urethra, classified in class 606, subclass 16.
- VI. Claims 48-49, drawn to a method of training a person to treat a body conduit, classified in class 434, subclass 262.

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus would be used to ablate cataracks

Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could be albate cataracts.

Inventions IV and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could be used ablate catararts.

Inventions V and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could be used to ablate cartaracts.

Inventions VI and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice

another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could

be used to ablate cataracte.

Inventions II, III, IV, V and VI are unrelated. Inventions are unrelated if it can be shown

that they are not disclosed as capable of use together and they have different modes of operation,

different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the

different inventions have different effects.

Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

A telephone call was made to Sanjay Bagade on March 31, 2000 to request an oral

election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication should be directed to David Shay at

telephone number (703) 308-2215.
